Opal Attach Dashboard

1. Overview

The Opal Attach Dashboard provides a detailed view of product attachment performance across opportunities. It enables sales leadership and operations teams to track how frequently Opal products are attached to deals, analyze cross-sell effectiveness, and evaluate performance across territories and time periods.

2. Purpose

- Track Opal-led opportunities and overall product attachment rates.
- Measure cross-sell performance across different product buckets.
- Analyze attachment trends by territory and time period.
- Support data-driven strategies to improve product adoption and revenue growth.

3. Data Sources

- **CRM / Sales System:** Opportunity data including product associations and deal ownership.
- **Product Catalog:** Product hierarchy and bucket classification.
- **Territory & Time Data:** Regional segmentation and time-based attributes.
- **Tools:** Power BI for visualization; SQL for data extraction, transformation, and KPI calculations.

4. Key Metrics / KPIs

- **Opal-Led Opportunities:** Number of opportunities driven or influenced by Opal products.
- **Opal Attach Rate:** Percentage of opportunities where Opal products are attached.
- **Product Bucket Attachment:** Attachment rate segmented by product categories or bundles.
- **Territory / Time Period:** Performance breakdown by region and selected timeframes.

5. Architecture & Technical Design

- **Data Pipeline:**
    - **Extract:** Pull opportunity and product-level data from CRM systems.
    - **Transform:** SQL scripts calculate attachment rates, classify product buckets, and normalize KPIs.
    - **Load:** Power BI data model enables interactive dashboards and cross-sell analysis.

- **Dashboard Views:**
    - **Overview View:** High-level Opal attach rate and opportunity metrics.
    - **Product Analysis View:** Attachment performance by product bucket.
    - **Segmentation View:** Breakdown by territory and time period.
- **Data Governance:**
    - Standardized logic for defining “Opal-led” and “attached” opportunities.
    - Timestamped and validated data ensures reporting consistency and accuracy.

6. Operational Features

- Drill-down from overall attach rate to product and opportunity-level insights.
- Identification of high-performing product bundles and cross-sell opportunities.
- Trend analysis of attachment rates over time.
- Comparative analysis across territories to identify performance gaps.
- KPI-based reporting to guide sales strategy and product positioning.

7. Benefits & Use Cases

- **Increased Product Attachment:** Identifies opportunities to improve attach rates.
- **Enhanced Cross-Sell Strategy:** Highlights effective product combinations.
- **Improved Sales Performance:** Enables targeted selling based on data insights.
- **Operational Visibility:** Provides leadership with clear insights into product adoption trends.
- **Data-Driven Decision Making:** Supports planning, forecasting, and sales optimization.

8. Conclusion

The Opal Attach Dashboard transforms opportunity and product data into actionable insights, enabling organizations to optimize product attachment and cross-sell strategies. By tracking attach rates across products, territories, and time periods, it provides a clear view of performance and opportunities for growth. With validated KPIs and structured analysis, the dashboard supports data-driven decisions that enhance sales effectiveness and maximize revenue potential.
